

Abdullah Mohammed Baomar Alamoudi Co.

Abdullah Mohammed Ba Omar Al Amoudi Corp is a Saudi Arabia–based import and export company located on Makkah Road, Al Farooq District 3215, Jeddah. The company operates across global trade lanes, leveraging Jeddah’s strategic position as a major logistics and commercial hub.

Abdullah Mohammed Baomar Alamoudi Co. reached out to us to integrate an ERP solution to efficiently manage its import-export operations and administrative processes.

SK Technology implemented a customized Odoo ERP solution tailored to the company’s trading and administrative needs. The system integrated key modules, including Inventory, Purchase, Sales, Accounting, and CRM, to streamline end-to-end business operations.

This implementation enhanced operational efficiency, improved trade visibility, and enabled data-driven decision-making for sustained growth in global markets.

Project Overview:

Abdullah Mohammed Baomar Alamoudi Co. is a Saudi Arabia–based import and export company operating across international trade markets. With growing global operations, the company required a centralized system to manage shipments, documentation, financial transactions, and customer relationships more efficiently.

Business Requirements:

The company needed an integrated ERP system to streamline import-export operations and administrative processes. Key requirements included real-time shipment tracking, centralized documentation management, efficient handling of supplier and customer relationships, accurate financial management with multi-currency support, and access to performance analytics for better decision-making.

Challenges:

The company faced difficulties in tracking international shipments, managing complex documentation processes, maintaining consistency in financial records across multiple currencies, and ensuring smooth coordination between departments. Limited visibility into trade operations and reliance on manual processes further affected efficiency.

Odoo ERP Solution Provided:

We implemented a customized Odoo ERP solution tailored to the company's trading operations, including:

Inventory Management: Real-time tracking of stock, shipments, and product movement across locations

Purchase Module: Streamlined supplier management and procurement processes

Sales Module: Efficient handling of customer orders, quotations, and sales workflows

Accounting Module: Integrated financial management with multi-currency support and automated reporting

CRM Module: Centralized management of customer relationships and sales pipeline tracking

Reporting & Dashboards: Customized analytics for monitoring trade performance and operational efficiency

Document Management: Organized handling of import-export documentation and compliance records

Outcome:

The implementation improved operational efficiency, enhanced visibility into trade and shipment activities, ensured accurate financial tracking, and strengthened coordination across departments. The company now benefits from data-driven decision-making and a scalable system that supports its continued growth in global markets.
