

## **(Mohammed Naji Al-Anzi Contracting Est. – Transportation / Logistics)**

Mohammed Naji Al-Anzi Contracting Est and Protective Shields form a leading Saudi group offering reliable contracting, construction, and professional security services. Mohammed Naji Al-Anzi Contracting Est is a first-class contractor delivering quality projects across the Kingdom, while Protective Shields provides trusted security guard services for companies, commercial centers, and industrial facilities through its branches in Riyadh, Jeddah, Jubail, and Dammam.

With multiple branches and diverse operations, the group met us to create a unified system to manage projects, logistics, workforce, and security services efficiently. We implemented a comprehensive Odoo ERP solution tailored to the group's multi-sector operations.

Mohammed Naji Al-Anzi Contracting Est. now operates with a fully integrated ERP system, enabling streamlined operations, better control, and reliable service delivery across all business sectors.

### **Project Overview:**

Mohammed Naji Al-Anzi Contracting Est., along with its sister company Protective Shields, operates as a leading Saudi group delivering contracting, construction, and professional security services across the Kingdom. With multiple branches and diverse operations, the group required a unified system to manage projects, logistics, workforce, and security services efficiently.

### **Business Requirements:**

- Centralized management of contracting and construction projects
- Fleet and transportation tracking for materials and workforce movement
- Workforce and security staff management across multiple locations

Integration of project costing, budgeting, and financial operations

Real-time monitoring of ongoing projects and service contracts

Customer and contract management system

Inventory and procurement management for construction materials and equipment

Automated invoicing, payroll, and financial reporting

Coordination between branches in Riyadh, Jeddah, Jubail, and Dammam

### **Challenges:**

Fragmented systems across contracting, logistics, and security operations

Difficulty in tracking the workforce and fleet across multiple regions

Limited visibility into project costs and operational performance

Manual processes leading to inefficiencies and delays

### **Odoo ERP Solution Provided:**

We implemented a comprehensive Odoo ERP solution tailored to the group's multi-sector operations, including:

**Project Management:** End-to-end tracking of construction and service projects

**Fleet & Logistics Management:** Monitoring of vehicles, routes, and transportation activities

**HR & Workforce Management:** Employee records, attendance, payroll, and security staff deployment

**Accounting & Finance:** Automated invoicing, expense tracking, and financial reporting

**CRM & Contract Management:** Centralized customer database and contract lifecycle management

**Inventory & Procurement:** Efficient handling of materials, equipment, and supplier processes

**Multi-Branch Management:** Integrated system connecting all regional branches

**Reporting & Dashboards:** Real-time insights into operations, costs, and performance

**Outcome:**

Improved coordination across contracting, logistics, and security services

Enhanced visibility into project progress and financial performance

Efficient workforce and fleet management across multiple cities

Reduced manual workload and increased operational accuracy

Scalable system supporting nationwide operations and future growth

Mohammed Naji Al-Anzi Contracting Est. now operates with a fully integrated ERP system, enabling streamlined operations, better control, and reliable service delivery across all business sectors.
